## U-NET® GROIN WOUND DRESSING

U-Net was designed to support and secure surgical dressings in place around the groin area. Mesh material provides visibility of dressings, ventilation and the detachable waist band allows ease of application on unconscious patients.

A range of sizes are available allowing the exertion of pressure on the wound to control bleeding whilst improving patient comfort.

For further information and to purchase please visit [www.mdti.co.uk](http://www.mdti.co.uk)

Please contact SHIL if you would like to:

- Receive information on price and availability
- Place an order
- Request further information on a product
- Enquire about manufacturing, licensing or distribution opportunities
- Receive advice on how to take a project further
