

Scottish Health Innovations Ltd (SHIL)

ACR® - AMBULANCE CHILD RESTRAINT

Invented by the Scottish Ambulance Service, the Ambulance Child Restraint (ACR) is a flexible, fully harnessing system used for secure and effective restraint of infants and children whilst they are being transported in an ambulance.

Available in 4 sizes and universally compatible with all stretchers, the ACR allows the safe restraint of children weighing between 2 – 45kg, preventing potentially dangerous movement during transportation.

For further information and to purchase please visit www.paraid.co.uk

Please contact SHIL if you would like to:

- Receive information on price and availability
- Place an order
- Request further information on a product
- Enquire about manufacturing, licensing or distribution opportunities
- Receive advice on how to take a project further
